Solve Squirrel math problems!

How many acorns are in each pile?

The squirrel is holding a small shovel and standing between three distinct piles of acorns on a grassy hill. The piles vary in size.

acorns acorns acorns

If the squirrel buries the biggest pile, how many will be left in the other 2 piles?

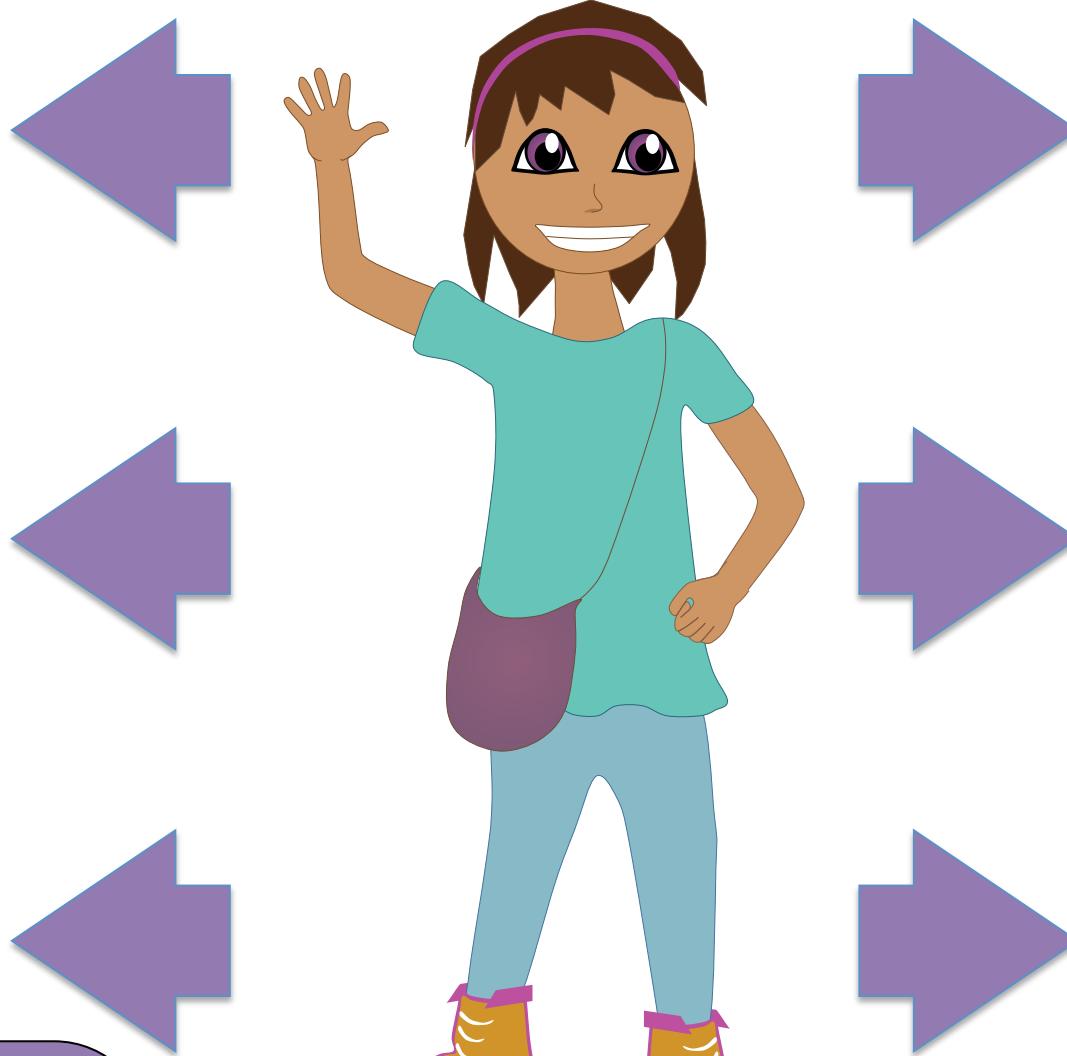

_____ acorns

A math problem card featuring a squirrel and acorn piles. It asks how many acorns are in each of three piles and then poses a question about what happens if the largest pile is buried.
