First ViewController: Myra

click on different features to build Myra,
then picture saves to other views

Each of these icons takes
you to the specific scene

Tabbed View
Controller

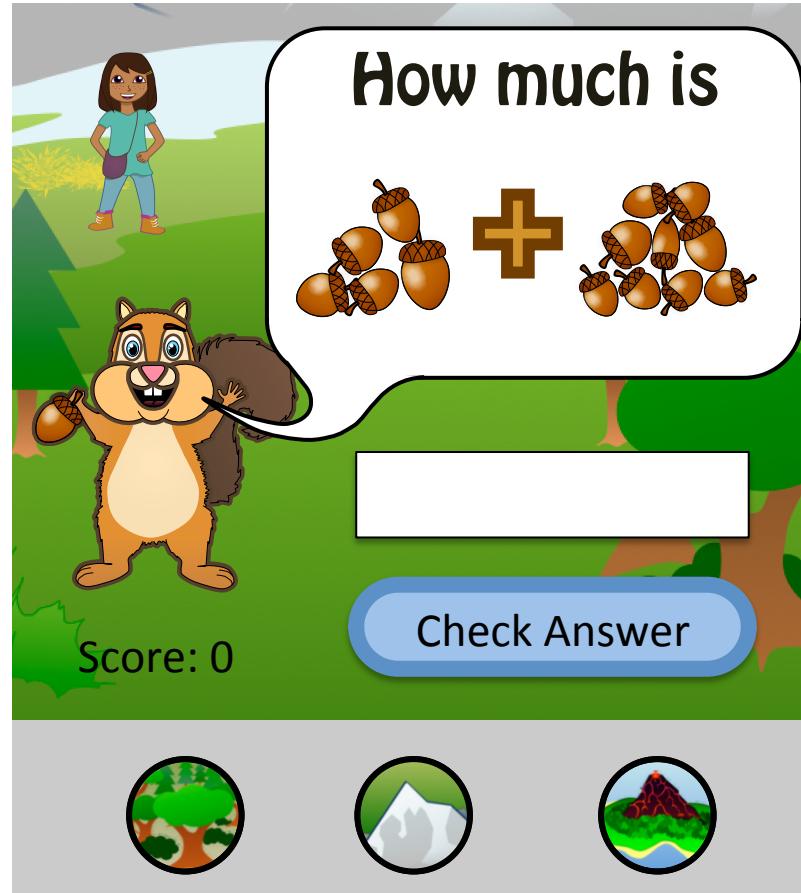

Forest Math ViewController

Updated UX for squirrel challenges

clicking on myra takes you back to customize her view

Score Variable increases as game progresses

Problem changes if correct

Mountain Image ViewController

On this page you will be able to access the camera and 'drop' objects into view and move them around

I have done something similar last semester so I am confident I can recreate this functionality in Xcode 8

clicking on myra takes you back to customize her view

Volcano Island Animal Quiz

animals scroll through
child must enter name
then app checks lower
case if correct
goes to next animal

what is this animal called?

Score: 0
